Additionally, it will outline how to mitigate risk in the management of informants and when they are deployed undercover, in addition to how to mitigate risk in the planning and execution enforcement operations when using undercover assets.

Review by a previous student: "...Selby draws on his years of domestic and international criminal investigative experience to teach Human Intelligence and Risk Mitigation in an engaging and informative manner. With harrowing real-life stories, and years of experience and lessons to draw from, Selby engages his audience and imparts the importance of recognizing potential issues and risks with informant handling. Without these skills, tunnel vision and lost objectivity can lead to dangerous and failed criminal investigations resulting in a loss of reputation, criminal/civil liability, and possibly physical harm to the handler or others. This course is a "must-attend" and definitive primer on informant handling for any criminal investigator, law enforcement supervisor, or intelligence officer working with informants and sources of information."
