Education & Training Unit

## **DUI Detection & Standardized Field Sobriety Testing** **(SFST Class)**

<b>Dates:</b>	September 15, 16 & 17 - 2021
<b>Days:</b>	Wed, Thur & Friday
<b>Times:</b>	0700 to 1600 hours
<b>Location:</b>	Seattle Police – Advanced Training Unit Park 90/5, Classroom #4
<b>Cost:</b>	FREE

*This course is encouraged and recommended for training officers, patrol officers and anyone else that is interested in learning more about identifying impaired individuals and processing impaired drivers.*

The DUI Detection & SFST Course is a comprehensive impaired driver detection course. The three-day course is designed to increase the law enforcement officer's abilities to detect the impaired driver. This class is also a pre-requisite for attendance at an Advanced Roadside Impairment Driving Enforcement (ARIDE) class.

During this National Highway Traffic Safety Administration (NHTSA) approved SFST course, students will develop skills in recognizing, investigating and articulating their observations related to DUI enforcement, both in their written reports and verbal courtroom testimony. Additionally, students will learn to successfully identify and discuss typical clues of alcohol impairment that may be seen during the SFST's and how effective DUI enforcement acts as a deterrent to this violation.

On the final day of the course, a live alcohol workshop "wet lab" will be conducted to allow students the opportunity to apply their training on subjects who may or may not have been dosed with alcohol.

This class provides a great refresher *to build your confidence* or *to just tune-up your impaired driving investigations*, especially if you haven't done any additional training since the academy. *This is the same class that is presented in the academy, but you will be doing it all in one 3-day block.*

**Any questions regarding the training, content &  
to sign-up should be directed to:**
