

AIRBORNE PUBLIC SAFETY ASSOCIATION

"To Serve, Save and Protect from the Air"

DESIGNED FOR TACTICAL OPERATIONAL SUPPORT

The Tactical sUAS Operators course is three days of intensive training designed to increase piloting skills and provide students with the ability to operate in non-traditional sUAS environments. Students will be exposed to the equipment, tools, and techniques necessary to expand their sUAS program for the tactical environment. Each day will consist of four hours of classroom instruction and four hours of flight instruction, applying sUAS capabilities to real world scenarios. Students will:

- Understand and apply techniques for interior operations
- Develop teaming concepts for use with other units or capabilities
- Utilize the sUAS as point and overwatch during tactical scenarios
- Understand Weight & Balance and Center of Gravity considerations for sUAS
- Identify issues associated with working in controlled airspace
- Operate as direct support for tactical team operations
