

Collision Investigation – Technical – WSP  
Course Code – COL0200

Upon successful completion of this course, participants will be able to:

- Understand vehicle collision concepts of pre- and post – collision paths.
- Demonstrate speed calculations from tire marks.
- Determine collision dynamics related to the damage, road, and injury evidence.
- Demonstrate scene measurement and diagramming for evidence.
- Understand the necessity and type of photographs for a collision scene.

Seats are very limited (4 for allied agency personnel) so early application is suggested. Be sure to indicate special agency needs to help us in the selection process.

Supplies students need to bring:

1. Note-taking materials, colored pencils
2. Scientific-type calculator (similar to Texas Instruments TI-30 III or TI-35) with sine, cosine, and tangent functions
3. Clipboard
4. 360-degree protractor – (there are a limited number available to borrow during class)
5. Two 30-, 60-, 90- degree drafting triangles – (there are a limited number available to borrow during class)
6. 100- or 300-foot measuring tape
7. Digital camera
8. Personal toiletries including towels, soap, and washcloth
9. Rain clothing and jumpsuit for outdoor exercises
