

## **Tactical De-escalation Techniques**      **December 15, 2020**

Spokane County Sheriff's Training Center, 6011 N. Chase Rd., Newman Lake, WA 99025

<b>Topics Covered:</b>	<b>Understanding De-escalation</b>	<b>Communicating Under Stress</b>
	<b>Showing Empathy to Others</b>	<b>Minimize Force Encounters</b>
	<b>Improving Public Perception</b>	<b>Maintaining Tactical Mindset</b>
	<b>Transitioning to Force</b>	<b>Proper Documentation</b>

**Course Overview:** Across the United States, police departments spend countless hours training officers on the use of force involving simple wrist locks and pressure points; chemical agents and physical strikes; and progressing to impact weapons and firearms. While this type of training is critical for all law enforcement officers, agencies must provide proper "Tactical De-escalation Techniques" to officers as well.

Regardless of an agency or officer's individual views of deescalation tactics, it **MUST** be implemented into every police department's training program. Many officers believe that the use of de-escalation techniques will jeopardize their safety and place them at a tactical disadvantage. The proper use of de-escalation has the complete opposite effect. Statistics and studies will show that it increases officers' safety and places the officer in a more advantageous tactical position.

This one-day training class will provide officers with the necessary tools to properly de-escalate a situation while maintaining a tactical mindset. Officers will learn effective techniques for communicating under stress without escalating a situation.

Practical, classroom-based scenarios will be presented to demonstrate these concepts. Information will also be presented on the development of reality-based, simulation training involving deescalation techniques. This information will give officers a jump starts on implementing de-escalation training within their own police departments.

\$149 - per officer

\$129 - group rate for 5 or more
